To Whom It May Concern:

Freyenhagen Construction was recommended to us by a member of our church.

We contracted Freyenhagen Construction to build an elevator shaft where there had previously been two closets and a bookshelf.

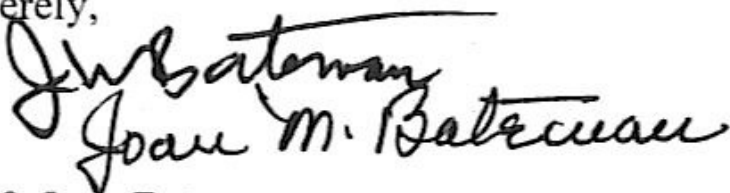

The project was completed on time and was done very well. We always received top level service. Jeremy and his crew were always open to our wishes and worked around our schedule.

We were very impressed with the level of communication brought to our project, either in person or via the notebook in our personal "mailbox."

Jeremy's crew went the extra mile to insure that the rest of our home was well protected during the demolition phase of our project. We greatly appreciated their efforts in this area.

Everyone who worked on our elevator shaft was prompt, courteous and thoughtful. We would highly recommend Freyenhagen Construction to anyone wishing to pursue a remodeling project.

Sincerely,

A handwritten signature in black ink that reads "Jim Bateman" on the top line and "Joan M. Bateman" on the bottom line. The signature is written in a cursive, flowing style.
