To Whom It May Concern:

We were impressed with the work that Freyenhagen Construction did at our friend's home. Because of this we chose to use them for our own home remodel.

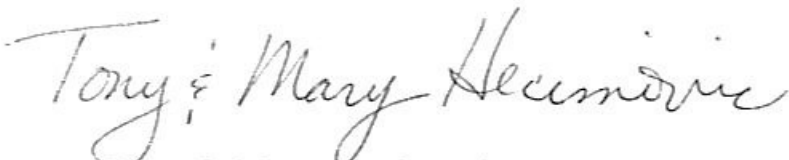

Jeremy and his staff helped us to solve the design problems that we had in our kitchen. They opened the space by taking out the island, which gave us a better flow for working in the kitchen, in addition to adding more storage and counter space.

We were very impressed that the project was completed on time. We were given a schedule at the beginning of the project outlining each phase. We always knew what was happening and also knew what was going to happen next. In addition to the schedule, the project manager gave us updates as well.

The customer service was wonderful. When I was unsure which can lights I liked, they brought both types to the house so I could make a decision as to which would work best in the kitchen.

Everyone that came into our home treated it with respect. All of the workers were polite and knowledgeable. It was obvious that the members of the crew were excellent craftsmen. They were very open about explaining their trade to me so that I could understand what they were doing.

I would recommend Freyenhagen Construction because of the professional way they approached our remodel. They were timely and the finished product is beautiful. **We love it!**
