

On May 4, 2001 we first signed the construction agreement with Freyenhagen Construction. We found Freyenhagen Construction to be a very professional construction organization that do quality work.

One experience that made me happy was: One of my favorite parts of our old house has always been the solid hardwood doors. When we changed the design of one of the closets, I thought we would have to get new doors that wouldn't look as good. The carpenters, suggested how we could use our old doors. It was a great idea!

One of the benefits of the work done on our kitchen remodel is allowing us to live more comfortably in our small home. The room is much brighter, has more storage and is a much better use of space.

Jeremy was extremely helpful in that he was truly willing to listen to our ideas and goals and was willing to try to get them all accomplished. He was also interested in making sure we were satisfied with the quality of work from his crew.

I have already referred Freyenhagen Construction to friends who are interested in do a kitchen remodel. We would refer Freyenhagen Construction to anyone because we believe they do a good job.

Thanks Jeremy,

Pam & Tom Dimich
